Mr. Crumpler.

We are pleased to report our progress on serving Wayne County with broadband internet.

Accomplishments:
- Over 250 active broadband customers
  - 173 around Mount Olive
  - 63 around Seven Springs
  - Remainder in Goldsboro and Fremont

Map of installed broadband customers around Mount Olive as of 2-3-20
Map of installed broadband customers around Seven Springs as of 2-3-20

Customers: While the vast majority of our customers are residential, notable clients include: The University of Mount Olive, the Fire Station in Seven Springs, the Airport in Mount Olive, Carolina Nut, all the town buildings in Mount Olive including Police and Fire Stations, the NC Forest Service office in Goldsboro, and several churches in the county.

Downtown Wi-Fi zones, free to the public, were established in:
- Mount Olive
- Seven Springs
- Bryan Sports Complex.

Towers: Equipment has been mounted on Wayne Water District water towers, Fremont and Mount Olive water towers, private towers including Sutton Radio & TV, grain elevators including Carolina Nut, and building rooftops including the Wayne National Building at 139 W Walnut St. building in downtown Goldsboro.

Fiber: Open Broadband procured two gigabit fiber connections into the county, one terminating in Goldsboro and the other in Mount Olive.

Duplin County ‘spillover’: Your friends in Duplin County should be thanking Wayne County for launching the broadband project. We’ve turned up an additional 50 customers in Calypso and Faison, including service to the towns themselves, a Fire Department, the Tri-County Gin, and Alphin Insurance.
The Pilot Program worked – let’s expand:
The state is providing broadband grants (the GREAT grant program) to ISPs to build into unserved census blocks in Tier 1 counties. Wayne County qualifies for 2020 and Open Broadband plans to submit a grant request in March to expand broadband coverage further in the county. While there is no cost to the county to be submitted for a grant we would like your help in the following ways:

• Extra points are awarded in the application if the ISP partners with the county. We hope that we’ve earned your trust and will support our grant application by agreeing to be our partner.
• What does being a partner mean? There is no cash or labor required from the county to be a partner. However, the county should be supportive of the project by providing access to county-owned towers and rooftops in order to place antennas to provide coverage. Open Broadband has already been working with the county on tower access, and plans to install in Grantham this year. As new towers are considered for county use we would like consideration to use them to expand broadband access.
• We already have a good working relationship with Wayne Water Districts. As part of the grant application we plan to expand the number of water towers where our antennas are mounted.
• Open Broadband would like to expand service to the county itself. Many times there is a term commitment that may preclude a vendor change, and we appreciate the opportunity to submit a competitive bid when service opportunities become available. The stronger our revenue base, the better position we are in to expand service coverage to others.

We would like to thank the Wayne County Commissioners and the county management for their support of bringing broadband service into the county. Open Broadband operates in 12 counties across North Carolina, and we routinely point to Wayne County as a role model for how a public-private partnership can work.

Thank you for your support, and please call or email me with any questions or suggestions.

After a review of actual and lapsed salaries through January 2020, it was determined that the Retirement line item for Goldsboro-Wayne Transportation Authority (GWTA) is not sufficient for the remainder of the year. Since GWTA reimburses the County for its salaries, a total of $950 is being anticipated and appropriated to cover the shortfall in this line item.

To: Finance

From: Berry Gray, Planning Director

Date: February 6, 2020

Re: Budget Amendment

The Planning/GIS Department is requesting a budget amendment to move $16,500 from Non Capital Equipment-Computer to Capital Outlay in order to replace the current Map Plotter. The Map Plotter is used for GIS mapping services to print, copy and scan large scale plans and maps for the Planning/GIS Department as well as for other departments/agencies such as OES, Facility Services, towns, etc. Without a fully functioning plotter, Planning/GIS will not be able to provide needed mapping services.

The current map plotter is currently not functioning properly in that the scanner's computer has gone bad and is no longer operating. The parts for replacement for the scanner are no longer produced. Printing is now slow and you can no longer make map copies through the scanner.
